DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 2, and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by Yamawaki et al. (6,184,637).

As recited in claim 1, Yamawaki et al. disclose a control unit for an electric power steering apparatus that controls a motor (8) for giving steering assist force to a steering mechanism based on a current control value calculated from a steering assist command value calculated based on the steering torque (T) generated in the steering shaft as discussed in column 4, lines 13-24 and lines 42-45, and a current value (Ims) of the motor (8), wherein the control unit (13) comprises a current dither signal generating unit (26) for generating a current dither signal when the motor angular velocity is within a predetermined range of an angular speed and for adding the current dither signal to the steering assist command value as seen in figure 2 and as discussed in column 5, lines 16-42.

As recited in claim 2, Yamawaki et al. disclose the control unit for an electric power steering apparatus, wherein the predetermined value is the angular velocity of the motor corresponding to the static friction as discussed in column 5, lines 4-42 and column 6, lines 28-67.

As recited in claim 6, Yamawaki et al. disclose the control unit for an electric power steering apparatus, wherein the angular velocity is obtained at a motor angular velocity estimating section (24) which inputs a motor terminal voltage and a motor current.

Allowable Subject Matter

3. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
